] pexip[*Epic*

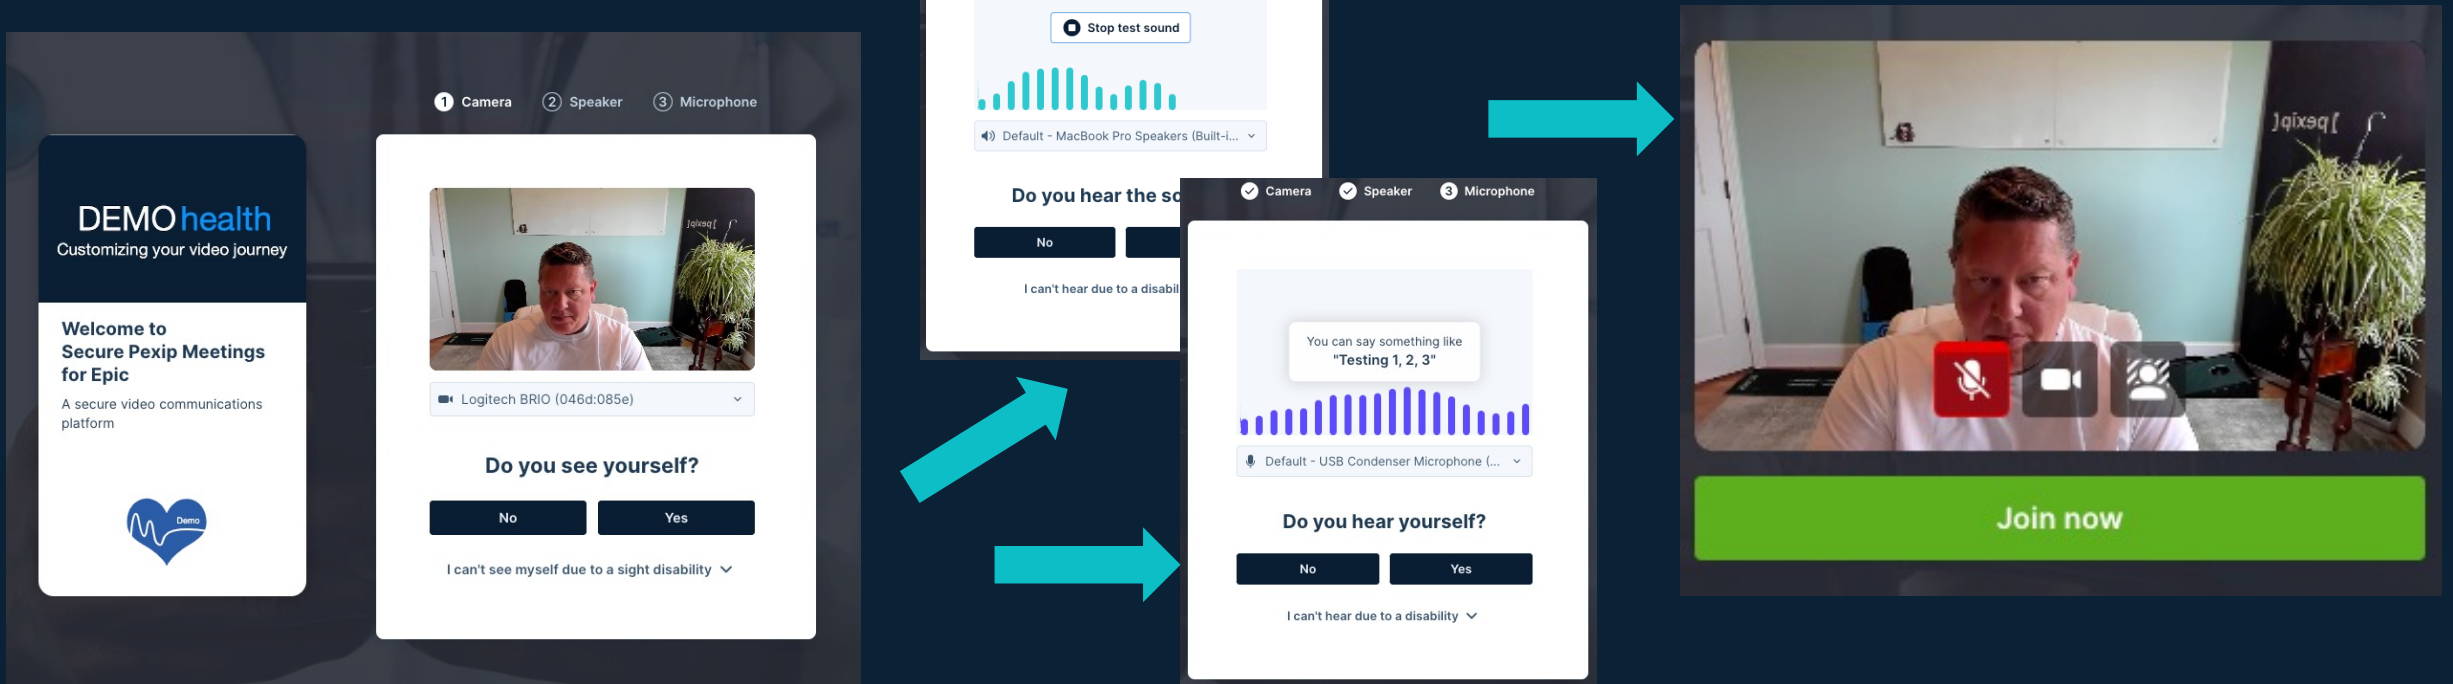

Epic – Example Workflow

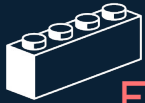

Patient – Start a Step-by-Step Join Flow

Epic – Eliminate Join Fatigue with PreFlight Check

**Provider – More time to focus on patient
And less time troubleshooting**

Infinity with Epic | Customizing The Video Experience

Extending with Plugins

Level 1 Customization

- Pexip Web Apps are fully open source and can be customized using modular, lightweight plugins
- Sample application customizations include ad-hoc SMS / email invitations (e.g. Twilio), pre-defined dial-out to interpreter services, automated dialing to SIP endpoints, and many more
- Pexip developer support can be purchased as an add-on
- Web app supports code-free custom branding through the Pexip Branding Portal
