# Pexip Connect for Teams Rooms

Enabling SIP meetings from Teams Rooms

]pexip[ +  Microsoft

**Pexip Connect for Teams Rooms greatly enhances the experience of joining a non-Teams meeting from a Teams Rooms device.**

# Pexip Connect for Teams Rooms

The most comprehensive interoperability solution for Teams Rooms devices.

## What?

Pexip Connect for Teams Rooms enables Teams Rooms devices to join any SIP-enabled meeting such as Webex, Zoom, Google Meet, and others with simple one touch to join, full dual-screen display and native in-room content sharing capabilities.

## For whom?

Pexip Connect for Teams Rooms is perfect for organizations that have Teams and Teams Rooms but are also invited to other types of meetings from internal or external parties.

## Why?

Making sure Teams Rooms are not limited to only joining native Teams meetings makes them much more useful as they can be used for all the organization members' meeting requirements.

# Why Pexip Connect for Teams Rooms?

Microsoft reports more than one million Teams Rooms in use by organizations world-wide

Still, people use a variety of meeting services that don't work as good as they could with Teams Rooms

Currently, Direct Guest Join offers users a less-than-ideal join and in-meeting experience – such as no dual-screen display and no content sharing

Pexip Connect for Teams Rooms solves these shortcomings and greatly improves user experience and customer satisfaction

Pexip Connect for Teams Rooms ensures organizations can use their Teams Rooms to join any kind of meeting, making the rooms much more usable for everyone

# What is Pexip Connect for Teams Rooms?

Pexip Connect for Teams Rooms is a high-quality alternative to Direct Guest Join.

Pexip Connect for Teams Rooms enables Teams Rooms to join any internal or external Teams meeting using Pexip's interoperability service.

Pexip Connect for Teams Rooms seamlessly integrates with the room device calendar and provides users with a familiar experience when joining 3<sup>rd</sup> party meetings.

Pexip Connect for Teams Rooms supports one touch to join meetings, full use of dual screen systems, in-room content sharing, and other native features in the room whilst in 3<sup>rd</sup> non-Teams meetings.

## At-a-glance:

Delivered globally as a service.

Available in August for MTRoW, and for MTRoA in 2025.

Simple Pexip Connect for Teams Rooms licensing.

Easy enablement of all systems enterprise-wide.

# How does Pexip Connect for Teams Rooms work?

Seamless integration provides improved user experience when connecting to 3P meetings from Teams Rooms

Teams Rooms can join 3<sup>rd</sup> party SIP-enabled meetings using native Microsoft one touch to join or by entering Meeting ID and passcode.

.. and many more

# Why the Pexip for Zoom meeting experience is better

Massively improved user experience when connecting to Teams meetings from Zoom Rooms

## Pexip Connect for Teams Rooms experience vs

Single Screen

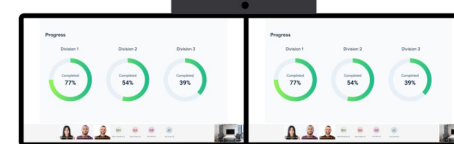

Direct Guest Join

Pexip Connect for Teams Rooms

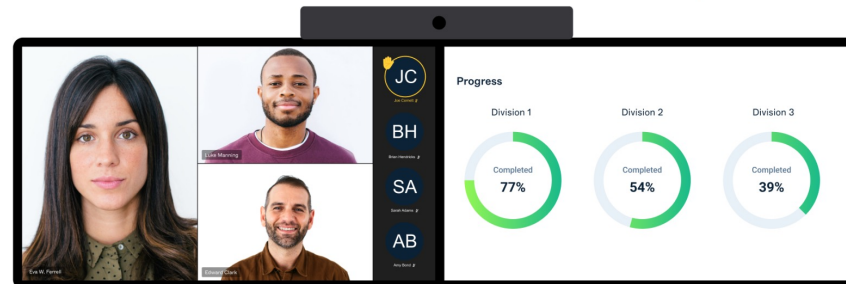

Dual Screen

Go from this...

Direct Guest Join  
Problem: Small video feeds, duplicated content

...to this.

Pexip Connect for Zoom Rooms  
Solution: Video-first experience, optimized for dual screens

### User Experience Challenges

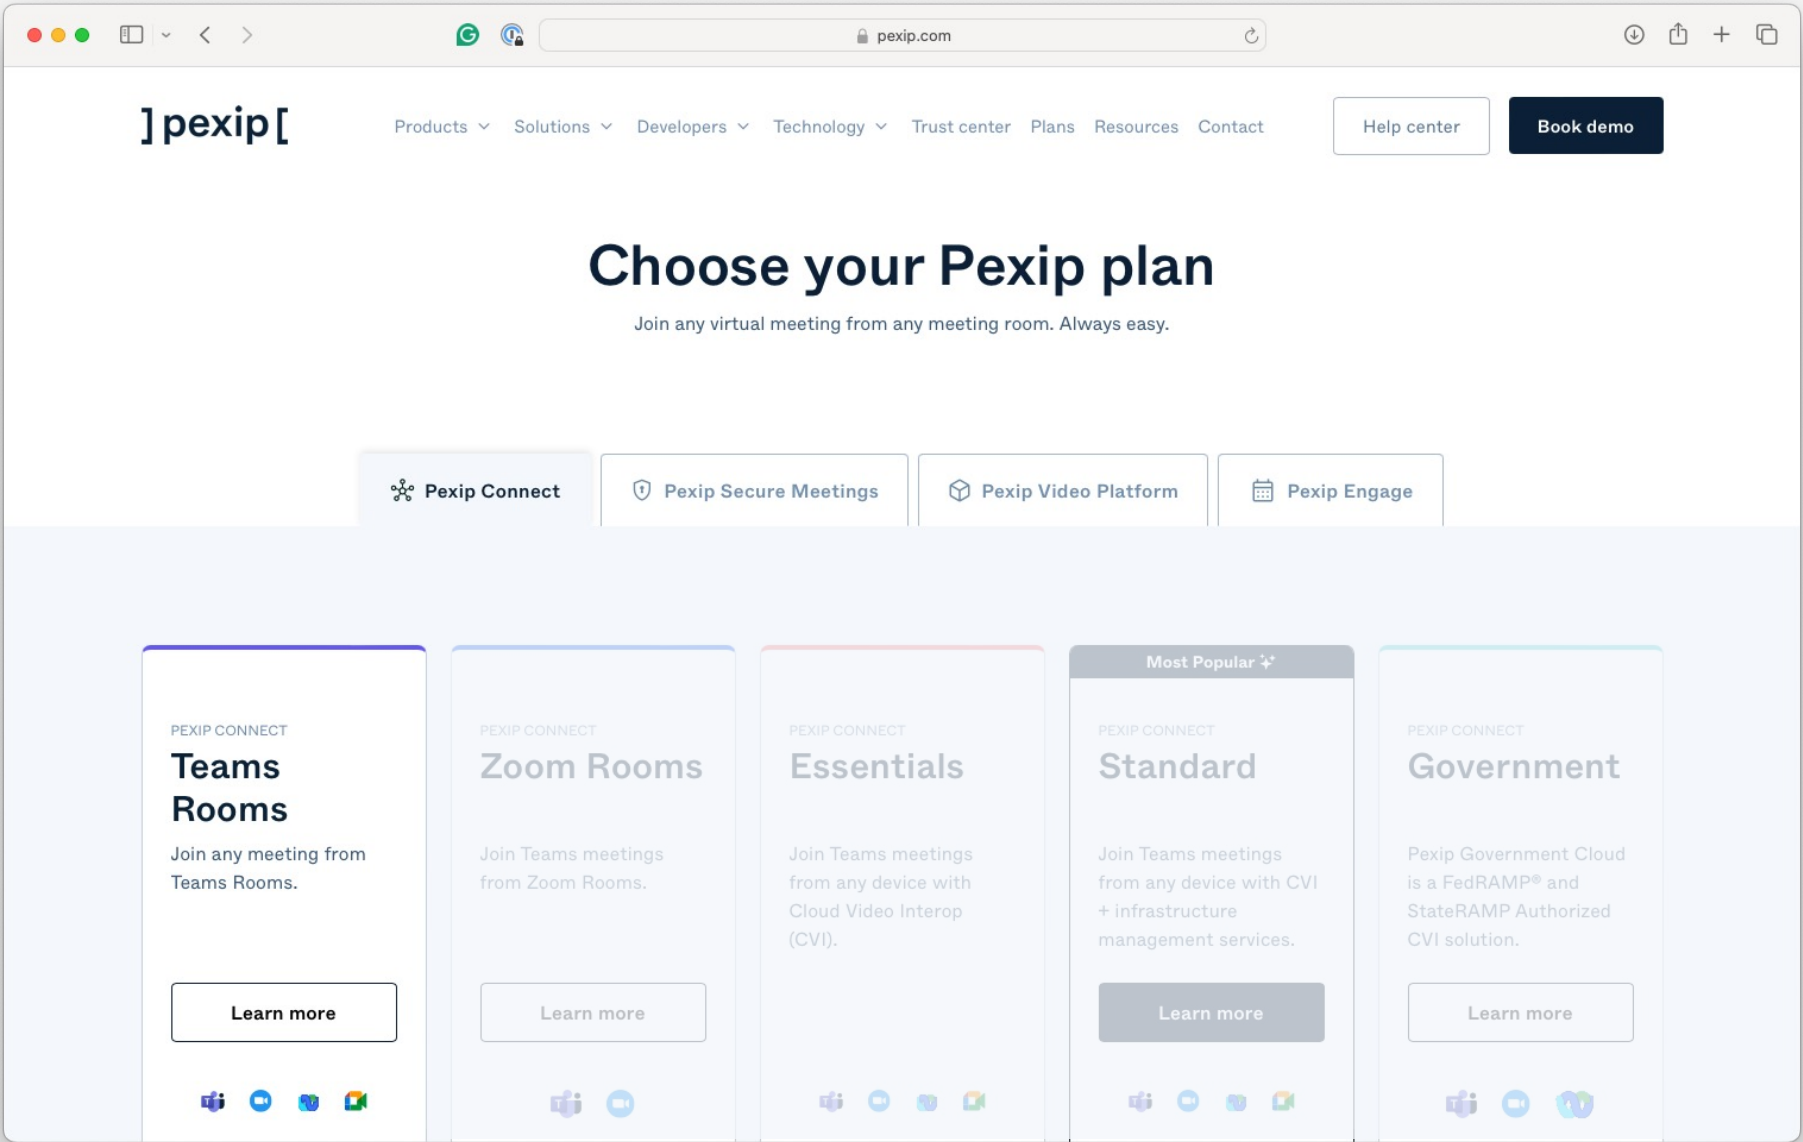

- Slower launch relative to Pexip Connect for Teams Rooms
- Reduced focus on participants when receiving content
- Does not support in-room content sharing – only receive
- Only single screen is supported
- Content is replicated on both screens if on a dual-screen system

### Strengths

- Quicker and more reliable meeting join experience
- Support one touch to join and ad-hoc join using Meeting ID
- Supports multiple screens with people and content using both
- Supports in-room screen sharing, e.g. using HDMI cable or in-room document camera

# Pexip Connect for Teams Rooms plan

# How to buy

Available where and how you want to buy it
