

Creating Custom Dashboards with Management API

March 2024

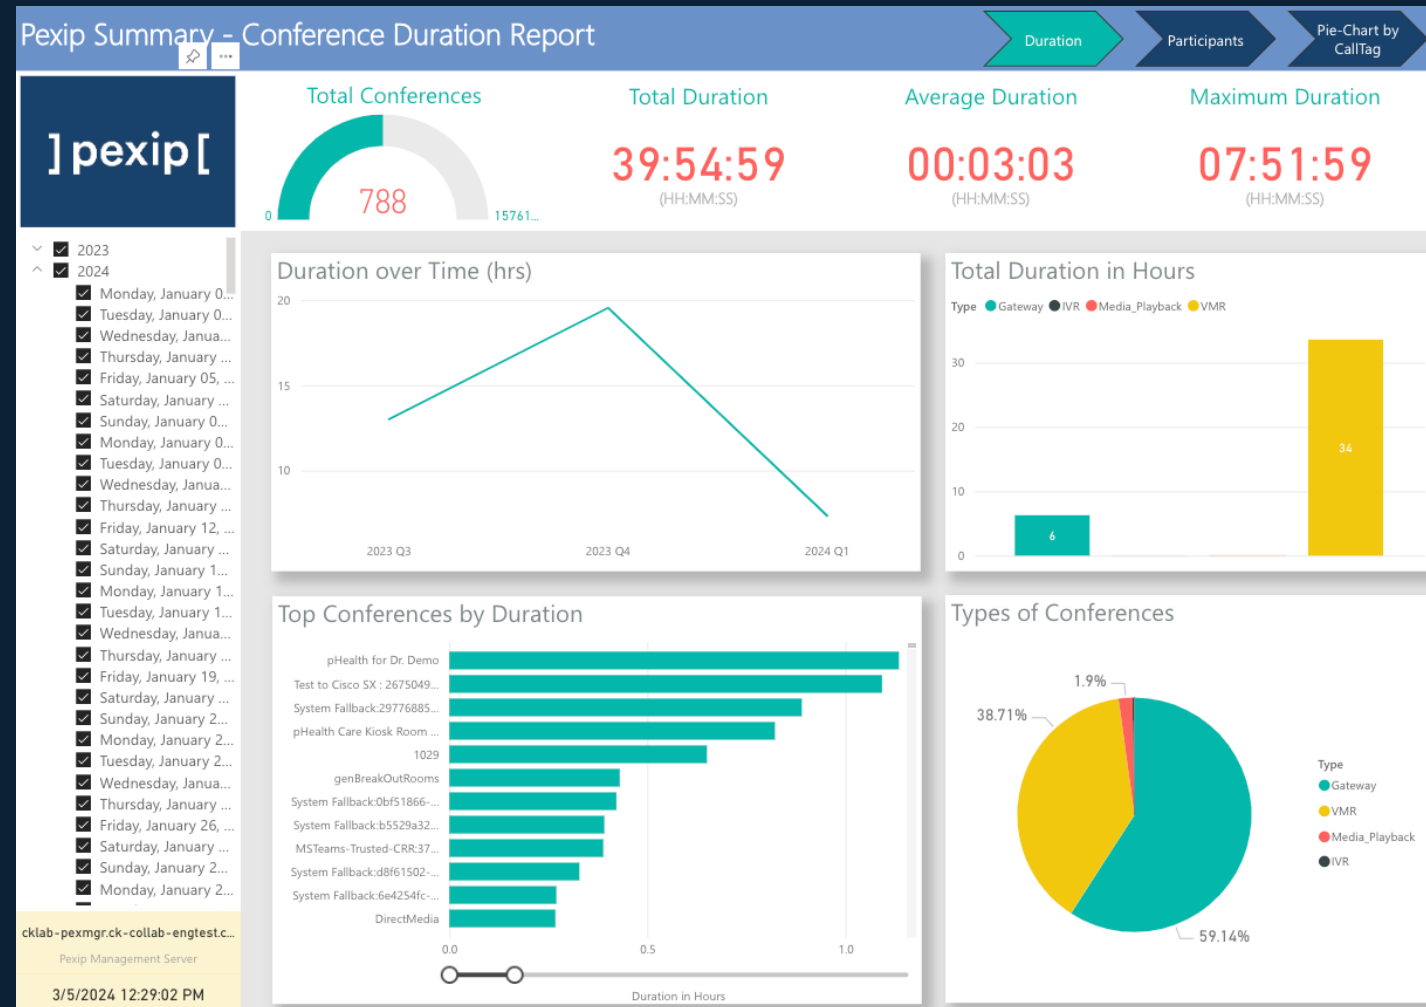

]pexip[

A decorative geometric pattern consisting of a series of parallel, slightly curved lines that create a sense of depth and movement, extending from the bottom right towards the top right of the slide.

Creating Dashboards

- Use Pexip's robust Management API to log historical events into a database
- Build custom dashboards to create overviews from utilization, system health, to call quality
- Plan for growth and see peak utilization hours
- Customize detail from the executive level to engineers with Pexip's extensive API list

] pexip[

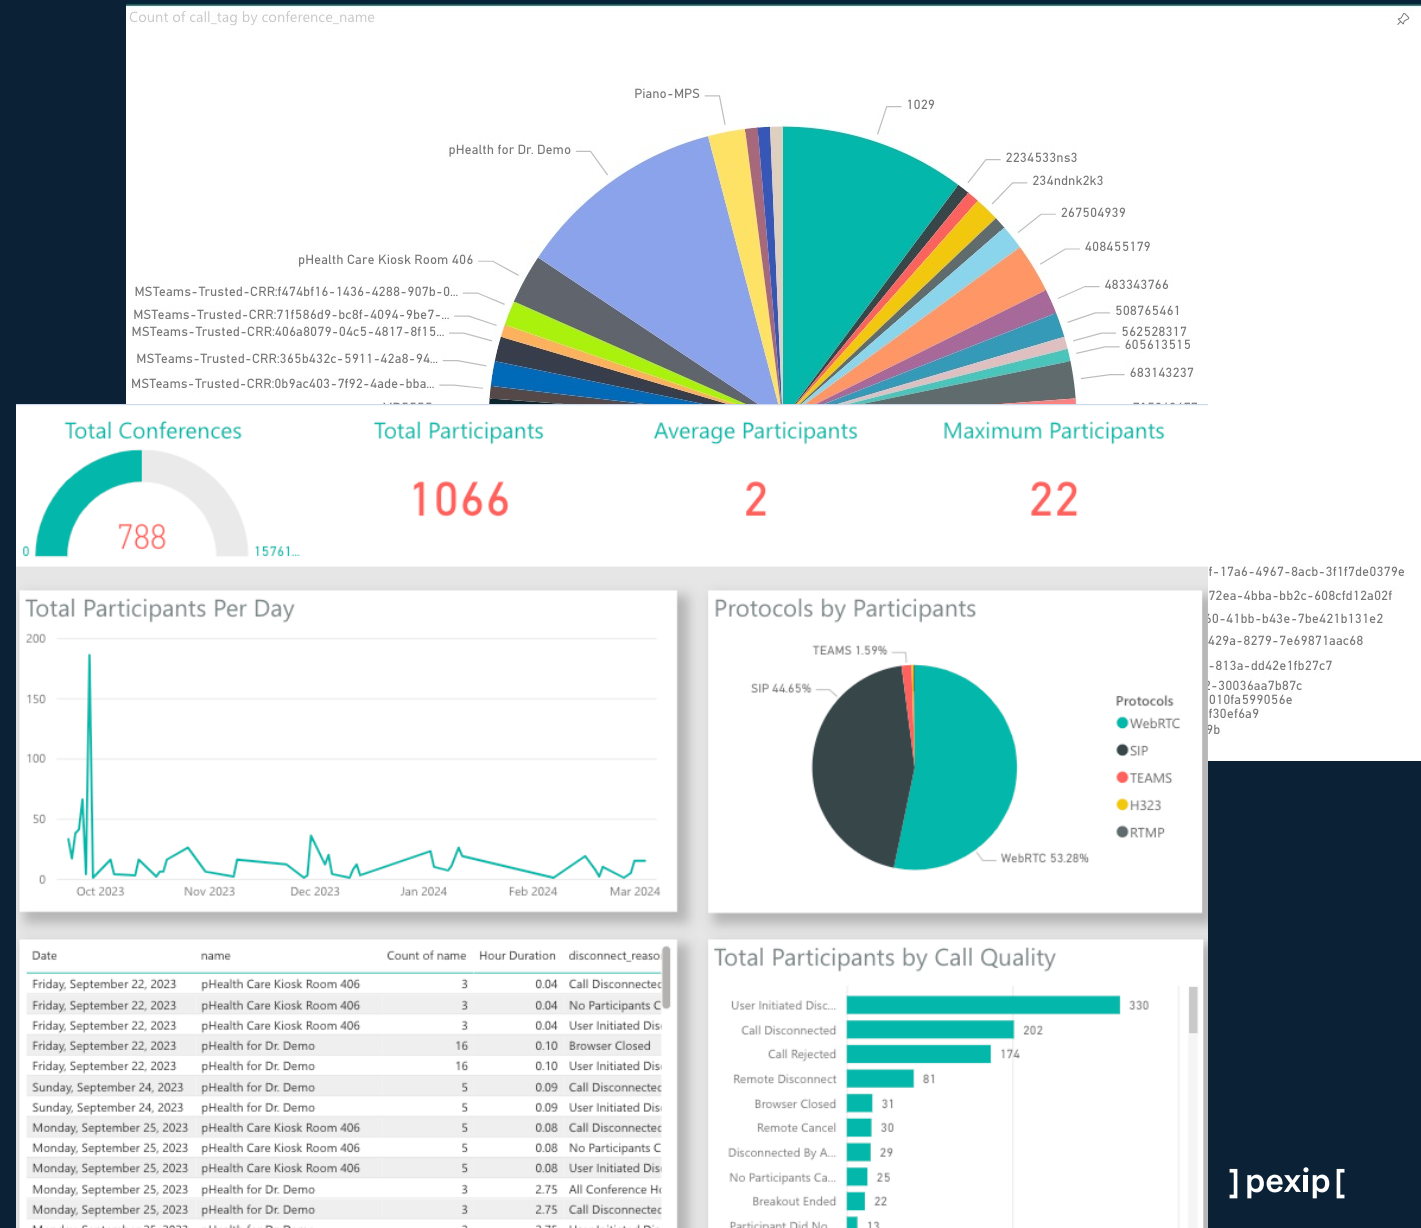

Your tools your way

- Call activity is recorded in a database on the MGT node, use the REST API to extract conference and participant history into CSV files daily or databases
- Use your scripting tools to extract the data and import into your analytic tool of choice
- Pexip provides some examples to get you started with PowerBI
